- + Critical (P1) = 4 hours
- + Major (P2) = 24 hours
- + Minor (P3) = 2-3 days

GP51000 - CollabNet Lab Management Software License - Up to 25 nodes - Includes 1 Year Silver Support (8x5 Phone)

CollabNet Lab Management is a cloud-based service that enables IT users to: configure environments; upload software assets, set up and tear down lab environments; and manage projects. As an integrated option to TeamForge™, it is the industry's only lab management solution completely integrated into an ALM tool suite offered from a single vendor. Lab Management provisions from a pool of virtual and physical servers in your private corporate data center or a public cloud, such as Amazon EC2 and CollabNet's server cloud. Provisioned configurations and servers can be deployed into a virtual lab with just the click of a button and teams save up to 90% of hard costs by centralizing development tool, server, and administrative infrastructure.

Silver Support allows your company to report 74 cases per year as well as to name 2 contacts to work with CollabNet through our CollabNet Support Portal. These are the response times for Silver Support cases:

- + Critical (P1) = 4 hours
- + Major (P2) = 24 hours
- + Minor (P3) = 2-3 days

GP51010 - CollabNet Lab Management Software License - Up to 75 nodes - Includes 1 Year Silver Support (8x5 Phone)

CollabNet Lab Management is a cloud-based service that enables IT users to: configure environments; upload software assets, set up and tear down lab environments; and manage projects. As an integrated option to TeamForge™, it is the industry's only lab management solution completely integrated into an ALM tool suite offered from a single vendor. Lab Management provisions from a pool of virtual and physical servers in your private

corporate data center or a public cloud, such as Amazon EC2 and CollabNet's server cloud. Provisioned configurations and servers can be deployed into a virtual lab with just the click of a button and teams save up to 90% of hard costs by centralizing development tool, server, and administrative infrastructure.

Silver Support allows your company to report 74 cases per year as well as to name 2 contacts to work with CollabNet through our CollabNet Support Portal. These are the response times for Silver Support cases:

H1000 - CollabNet Additional Managed Storage; GB/Month

CollabNet provides additional disk space to our customers. This storage space is fully managed from the perspective of provision to the customer and backup. The minimum purchased amount is 1 GB/month.

H1010 - CollabNet Additional Bandwidth; Mbps/Month

CollabNet provides additional bandwidth to our customers. The minimum purchased amount is 1 GB/1 Mbps/month.

H1040 - CollabNet Dedicated Staging Server

With the managed service option, CollabNet servers are housed at CollabNet datacenters that are redundantly connected to the CollabNet Internet peering partner's worldwide network backbone. They are connected to it via fast Ethernet trunks providing hundreds of megabits of bandwidth which are constantly monitored and can be expanded to satisfy increases in bandwidth requirements.

H1060 - CollabNet Domain Name Purchase

CollabNet will purchase and manage a domain name on the behalf of our customer.

H1070 - CollabNet Secure Socket Layer Certificate

Application Level Encryption and Authentication is provided over the public Internet and leverages SSL, SSH, and their associated authentication mechanisms. Access can be expanded to include network-level authentication and encryption between client infrastructure and CollabNet datacenters.

H2000 - CollabNet Virtual Disk; Per Year

Encryption of customer data at rest. "Software as a Service". Subscription includes (ATO Maintenance).

H3000 - CollabNet Enhanced Disaster Recovery

Each datacenter has escalation procedures in place and standard operating procedures for dealing with disaster recovery such as procedures for bringing up and down the entire facility are in place.

H3010 - CollabNet Active Disaster Recovery (w/o VPD); Per Year

Dedicated Hardware in DR Location Encrypted File System Support for DR Restoration: Guaranteed 16 hour service.

H3020 - CollabNet Active Disaster Recovery (w/VPD); Per Disk Space

Dedicated Hardware in DR Location Encrypted File System Support for DR Restoration: Guaranteed 4 hour service.

H4010-500-10-10 - CollabNet Lab Management Managed Infrastructure - Value; Intel 32 - (Linux/Windows) - Single Xeon Processors, 2GB Memory, 80GB (Qty expressed in # of Machines times # of Months)

Lab Management provisions from a pool of virtual and physical servers in a public cloud, such as Amazon EC2 and CollabNet's server cloud. Provisioned configurations and servers can be deployed into a virtual lab with just the click of a button and teams save up to 90% of hard costs by centralizing development tool, server, and administrative infrastructure.

H4020-500-10-10 - CollabNet Lab Management Managed Infrastructure - Value; Intel 32 - (Linux/Windows) - Dual Xeon Processors, 4GB Memory, 146GB - Raid 1(Qty expressed in # of Machines times # of Months)

Lab Management provisions from a pool of virtual and physical servers in a public cloud, such as Amazon EC2 and CollabNet's server cloud. Provisioned configurations and servers can be deployed into a virtual lab with just the click of a button and teams save up to 90% of hard costs by centralizing development tool, server, and administrative infrastructure.

H4030-500-10-10 - CollabNet Lab Management Managed Infrastructure - Value; Sun UltraSparc - Single UltraSparc Processor, 2GB Memory, 80GB (Qty expressed in # of Machines times # of Months)

Lab Management provisions from a pool of virtual and physical servers in a public cloud, such as Amazon EC2 and CollabNet's server cloud. Provisioned configurations and servers can be deployed into a virtual lab with just the click of a button and teams save up to 90% of hard costs by centralizing development tool, server, and administrative infrastructure.

H4040-500-10-10 - CollabNet Lab Management Managed Infrastructure - Value; Sun UltraSparc - Dual UltraSparc Processor, 4GB Memory, 146GB (Qty expressed in # of Machines times # of Months)

Lab Management provisions from a pool of virtual and physical servers in a public cloud, such as Amazon EC2 and CollabNet's server cloud. Provisioned configurations and servers can be deployed into a virtual lab with just the click of a button and teams save up to 90% of hard costs by centralizing development tool, server, and administrative infrastructure.

H4050-500-10-10 - CollabNet Lab Management Managed Infrastructure - Premium; Sun UltraSparc - Quad UltraSparc Processors, 8 GB Memory, 146 GB (Qty expressed in # of Machines times # of Months)

Lab Management provisions from a pool of virtual and physical servers in a public cloud, such as Amazon EC2 and CollabNet's server cloud. Provisioned configurations and servers can be deployed into a virtual lab with just the click of a button and teams save up to 90% of hard costs by centralizing development tool, server, and administrative infrastructure.

H4051-500-10-10 - CollabNet Lab Management Managed Infrastructure - Premium; Intel 32 - (Linux/Windows) - Dual Xeon Processors, 8GB Memory, 146GB - Raid 1(Qty expressed in # of Machines times # of Months)

Lab Management provisions from a pool of virtual and physical servers in a public cloud, such as Amazon EC2 and CollabNet's server cloud. Provisioned configurations and servers can be deployed into a virtual lab with just the click of a button and teams save up to 90% of hard costs by centralizing development tool, server, and administrative infrastructure.

H4052-500-10-10 - CollabNet Lab Management Managed Infrastructure - Premium; Intel 32 - (Linux/Windows) - Dual Xeon Dual Core Processors, 8GB Memory, 146GB - Raid 1(Qty expressed in # of Machines times # of Months)

Lab Management provisions from a pool of virtual and physical servers in a public cloud, such as Amazon EC2 and CollabNet's server cloud. Provisioned configurations and servers can be deployed into a virtual lab with just the click of a button and teams save up to 90% of hard costs by centralizing development tool, server, and administrative infrastructure.

P1600-F - CollabNet OnDemand;

On-demand single project space for CollabNet TeamForge. Per user.

P4000-500-10-10 - CollabNet Lab Management Software Manager (up to 25 nodes) - CollabNet Hosted, 1 Year License

- Will manage customizations/add-ons (no development work)
- Pre-install & Configuration & sizing interview
- Upgrade and/or migration should be discussed in advance of any order.

Training Package

- Includes Base Service
- System Administration Training

S7320 - CollabNet TeamForge Deployment without Training - Onsite (Requires Scoping at no additional charge); Travel and Expenses not included and to billed on actual incurred - not to exceed GSA per diem rates

Base Service

- Advanced Mode Install or upgrade
- Single or Multi=box install
- Any supported Database
- LDAP / Active Directory Integration (must be compatible)
- Will manage customizations/add-ons (no development work)
- Pre-install & Configuratin & sizing interview
- Upgrade and/or migration should be discussed in advance of any order.

S7325 - CollabNet TeamForge Deployment without Training - Remote (Requires Scoping at no additional charge)

Base Service:

- Advanced Mode Install or upgrade
- Single or Multi=box install
- Any supported Database
- LDAP / Active Directory Integration (must be compatible)
- Will manage customizations/add-ons (no development work)
- Pre-install & Configuratin & sizing interview
- Upgrade and/or migration should be discussed in advance of any order.

S7330 - CollabNet TeamForge Quick Start; Quick Start consultant provides comprehensive guidelines and assists in step-by-step roll-out of CollabNet TeamForge for small -to medium-sized organizations (< 500 users) (Requires Scoping at no additional charge); Travel and Expenses not included and to billed on actual incurred - not to exceed GSA per diem rates

Quick Start consultant provides comprehensive guidelines and assists in step-by-step roll-out of CollabNet TeamForge for small -to medium-sized organizations (< 500 users).

S7128 – F - CollabNet TeamForge Jumpstart; Per Day; (Requires Scoping at no additional charge); Travel and Expenses not included and to billed on actual incurred - not to exceed GSA per diem rates

- Assment of the organization’s current development processes and tools
- Includes group interview sessions with your organization’s development leaders/subject matter experts
- Determine and confirm the organization’s best practices for development
- Map the organization’s best development practices into CollabNet TeamForge structure
- Create at least one project template that can be used for creating new and newly on-boarded development projects
- Conclusion Report - Includes Recommendations such as integrations, training and/or consulting.

S7130 - CollabNet Collaborative Management; Per Month (Requires Scoping at no additional charge); Travel and Expenses not included and to billed on actual incurred - not to exceed GSA per diem rates

- Establishing Community Governance
- Establishing guidelines and criteria for new projects
- Accelerate end-user on-boarding
- Promoting ongoing community best practices
- Empowering, training, and connecting community members
- Creating community resources
- Improve reuse and community/open source contribution

S7160 - CollabNet Program/Engagement Management; Per Month (Requires Scoping at no additional charge); Travel and Expenses not included and to billed on actual incurred - not to exceed GSA per diem rates

A full-time resource to lead and manage a proven set of activities geared at rolling out a TeamForge implementation and driving adoption.

S7170 - CollabNet End-user support; Per Month (Requires Scoping at no additional charge); Travel and Expenses not included and to billed on actual incurred - not to exceed GSA per diem rates

CollabNet’s Personalized Support offering gives you a custom solution for your business. The program provides you with a designated System Administrator for all your requests, who will be your advocate at CollabNet. The System Administrator will personally monitor your cases and respond or route your queries as appropriate, using his strong knowledge of your configuration and environment. You can count on your admin to help you find the right knowledge base or self-help tools to meet your needs.

S7470 - CollabNet Community Support (Web Only); Per Month (Requires Scoping at no additional charge)

A part-time resource to provide technical assistance to specific customer questions, run regular metrics, complete technical tasks.

S1600 - Subversion Server Configuration & Admin - Onsite; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

Advice and assistance in setting up, administering and maintaining a Subversion server. We can assist in setting up your Subversion server environment or assess an existing environment. Covers the following areas:

- Hardware, software and network requirements and recommendations
- Authentication and authorization
- Integration with test and build systems
- Logging, troubleshooting and audit trails
- Backup and recovery

- Access Control, Release Management, Workspace Management
- Deploy a scalable and maintainable Subversion server environment
- Implement Subversion best practices and policies
- Integrate Subversion with your build and test systems

GS1650 - Configuration and Administration of a Subversion Server - Remote;

Advice and assistance in setting up, administering and maintaining a Subversion server. We can assist in setting up your Subversion server environment or assess an existing environment. Covers the following areas:

- Hardware, software and network requirements and recommendations
- Authentication and authorization

Training Services

GS1655 - Subversion Enablement Bundle - Basic (10-user); 10-user package of Subversion Web-Based Training, Q&A sessions and CollabNet Silver Subversion Support. All Class Materials Included

10 user package of Subversion Web-Based Training:

- Subversion for Developers - Essential Concepts 1 introduces developers to Subversion and the foundational concepts needed for typical Subversion usage in software development.
- Subversion for Developers - Essential Concepts 2 covers more advanced topics needed for typical Subversion usage in branching, tagging and merging operations.
- Subversion for Developers - Enterprise Features covers the advanced Subversion features, including topics in merge tracking, interactive conflict resolution, peg revisions and tree conflicts. These advanced features are particularly useful for enterprise software development.

Subversion Silver Support:

Silver Support allows your company to report 74 cases per year as well as to name 2 contacts to work with CollabNet through our CollabNet Support Portal. These are the response times for Silver Support cases:

- + Critical (P1) = 4 hours
- + Major (P2) = 24 hours
- + Minor (P3) = 2-3 days

GS1656 - Subversion Enablement Bundle - Basic (25-user); 25-user package of Subversion Web-Based Training, Q&A sessions and CollabNet Silver Subversion Support. All Class Materials Included

25 user package of Subversion Web-Based Training:

- Subversion for Developers - Essential Concepts 1 introduces developers to Subversion and the foundational concepts needed for typical Subversion usage in software development.
- Subversion for Developers - Essential Concepts 2 covers more advanced topics needed for typical Subversion usage in branching, tagging and merging operations.
- Subversion for Developers - Enterprise Features covers the advanced Subversion features, including topics in merge tracking, interactive conflict resolution, peg revisions and tree conflicts. These advanced features are particularly useful for enterprise software development.

Subversion Silver Support:

Silver Support allows your company to report 74 cases per year as well as to name 2 contacts to work with CollabNet through our CollabNet Support Portal. These are the response times for Silver Support cases:

- + Critical (P1) = 4 hours
- + Major (P2) = 24 hours
- + Minor (P3) = 2-3 days

GT2590 - CollabNet TeamForge End User Fundamentals - Web Based Training; 1 Day; Per Student; All Class Materials Included

CollabNet TeamForge End User Fundamentals provides a guided tour of CollabNet TeamForge™, introducing key concepts and demonstrating each component. The course covers the information that an end user will need to effectively work and collaborate within a project.

GT2591 - CollabNet TeamForge Project Administrator Fundamentals - Web Based Training; 2 hr, On Demand Web-Based Training; 1 Student; All Class Materials Included

CollabNet TeamForge 5.2 Project Administrator Fundamentals prepares project administrators to configure and manage CollabNet TeamForge™ projects. Attendees are expected to have an understanding of the topics covered in the End User Fundamentals training or have hands-on experience.

GT5005 - Subversion 1.6 for Developers - Module 1 (Essential Concepts 1) - Web Based Training; 2 hr, On Demand Web-Based Training; 1 Student; All Class Materials Included

Subversion for Developers - Essential Concepts 1 introduces developers to Subversion and the foundational concepts needed for typical Subversion usage in software development.

GT5006 - Subversion 1.6 for Developers - Module 2 (Essential Concepts 2) - Web Based Training; Per Student; 2 hr, On Demand Web-Based Training; 1 Student; All Class Materials Included

Subversion for Developers - Essential Concepts 2 covers more advanced topics needed for typical Subversion usage in branching, tagging and merging operations.

GT5007 - Subversion 1.6 for Developers - Module 3 (Enterprise Features) - Web Based Training; Per Student; 2 hr, On Demand Web-Based Training; 1 Student; All Class Materials Included

Subversion for Developers - Enterprise Features covers the advanced Subversion features, including topics in merge tracking, interactive conflict resolution, peg revisions and tree conflicts. These advanced features are particularly useful for enterprise software development.

GT5008 - Subversion 1.6 for Developers - Complete Series - Web Based Training; 6 hr, On Demand Web-Based Training; 1 Student; All Class Materials Included

Subversion for Developers - Essential Concepts 1 introduces developers to Subversion and the foundational concepts needed for typical Subversion usage in software development.

Subversion for Developers - Essential Concepts 2 covers more advanced topics needed for typical Subversion usage in branching, tagging and merging operations.

Subversion for Developers - Enterprise Features covers the advanced Subversion features, including topics in merge tracking, interactive conflict resolution, peg revisions and tree conflicts. These advanced features are particularly useful for enterprise software development.

GT6190 - Subversion for Developers - Module 1 (Essential Concepts 1) - Web Based Training (Store); 2 hr, On Demand Web-Based Training; 1 Student; All Class Materials Included

Subversion for Developers - Essential Concepts 1 introduces developers to Subversion and the foundational concepts needed for typical Subversion usage in software development.

GT6191 - Subversion for Developers - Module 2 (Essential Concepts 2) - Web Based Training; Per Student; 2 hr, On Demand Web-Based Training; 1 Student; All Class Materials Included

Subversion for Developers - Essential Concepts 2 covers more advanced topics needed for typical Subversion usage in branching, tagging and merging operations.

GT6192 - Subversion for Developers - Module 3 (Enterprise Features) - Web Based Training (Store); Per Student; 2 hr, On Demand Web-Based Training; 1 Student; All Class Materials Included

Subversion for Developers - Enterprise Features covers the advanced Subversion features, including topics in merge tracking, interactive conflict resolution, peg revisions and tree conflicts. These advanced features are particularly useful for enterprise software development.

GT6193 - Subversion for Developers - Complete Series - Web Based Training; Per Student; 6 hr, On Demand Web-Based Training; 1 Student; All Class Materials Included

Subversion for Developers - Essential Concepts 1 introduces developers to Subversion and the foundational concepts needed for typical Subversion usage in software development.

Subversion for Developers - Essential Concepts 2 covers more advanced topics needed for typical Subversion usage in branching, tagging and merging operations.

Subversion for Developers - Enterprise Features covers the advanced Subversion features, including topics in merge tracking, interactive conflict resolution, peg revisions and tree conflicts. These advanced features are particularly useful for enterprise software development.

T6100 - Subversion 1.5 - What's New in Subversion 1.5 - Web Based Training; 30 min, On Demand Web-Based Training; 1 Student; All Class Materials Included

Short introduction to the new features in Subversion 1.5.

T6105 - Subversion 1.5 for Developers - Module 1 (Essential Concepts 1) - Web Based Training; 2 hr, On Demand Web-Based Training; 1 Student; All Class Materials Included

Subversion for Developers - Essential Concepts 1 introduces developers to Subversion and the foundational concepts needed for typical Subversion usage in software development.

T6106 - Subversion 1.5 for Developers - Module 2 (Essential Concepts 2) - Web Based Training; 2 hr, On Demand Web-Based Training; 1 Student; All Class Materials Included

Subversion for Developers - Essential Concepts 2 covers more advanced topics needed for typical Subversion usage in branching, tagging and merging operations.

T6107 - Subversion 1.5 for Developers - Module 3 (Enterprise Features) - Web Based Training; 2 hr, On Demand Web-Based Training; 1 Student; All Class Materials Included

Subversion for Developers - Enterprise Features covers the advanced Subversion features, including topics in merge tracking, interactive conflict resolution, peg revisions and tree conflicts. These advanced features are particularly useful for enterprise software development.

T6108 - Subversion 1.5 or Developers - Complete Series - Web Based Training; 6 hr, On Demand Web-Based Training; 1 Student; All Class Materials Included

Subversion for Developers - Essential Concepts 1 introduces developers to Subversion and the foundational concepts needed for typical Subversion usage in software development.

Subversion for Developers - Essential Concepts 2 covers more advanced topics needed for typical Subversion usage in branching, tagging and merging operations.

Subversion for Developers - Enterprise Features covers the advanced Subversion features, including topics in merge tracking, interactive conflict resolution, peg revisions and tree conflicts. These advanced features are particularly useful for enterprise software development.

T6300 - Subversion 1.4 for Developers - Module 1 (Essential Concepts) - Web Based Training; 1 hr, On Demand Web-Based Training; 1 Student; All Class Materials Included

Subversion for Developers - Essential Concepts 1 introduces developers to Subversion and the foundational concepts needed for typical Subversion usage in software development.

T6400 - Subversion 1.4 for Developers - Module 2 (Advanced Concepts) - Web Based Training; 1 hr, On Demand Web-Based Training; 1 Student; All Class Materials Included

Subversion for Developers – Advanced Concepts covers more advanced topics needed for typical Subversion usage in branching, tagging and merging operations.

GT4010 - CollabNet Web Based Training Passport - 2 hr/each, On Demand [5-User Bundle of any available CollabNet Web Based Training course]; All Class Materials Included

CollabNet WBT Training Passport Bundles come in a 5, 10, 25 or 50 course size package and allows purchasers to choose from any of the individual WBT courses listed above

GT4020 - CollabNet Web Based Training Passport - 2 hr/each, On Demand [10-User Bundle of any available CollabNet Web Based Training course]; All Class Materials Included

CollabNet WBT Training Passport Bundles come in a 5, 10, 25 or 50 course size package and allows purchasers to choose from any of the individual WBT courses listed above

GT4030 - CollabNet Web Based Training Passport - 2 hr/each, On Demand [25-User Bundle of any available CollabNet Web Based Training course]; All Class Materials Included

CollabNet WBT Training Passport Bundles come in a 5, 10, 25 or 50 course size package and allows purchasers to choose from any of the individual WBT courses listed above

GT4040 - CollabNet Web Based Training Passport - 2 hr/each, On Demand [50-User Bundle of any available CollabNet Web Based Training course]; All Class Materials Included

CollabNet WBT Training Passport Bundles come in a 5, 10, 25 or 50 course size package and allows purchasers to choose from any of the individual WBT courses listed above

GT5031 - Subversion 1.6 for Administrators (Full Day) - Remote (Web / Phone Based); Max 5 Students; All Class Materials Included

Subversion for Administration - Advanced covers server configuration, repository layout, strategies for backup and recovery, and migration from legacy systems. This course also includes advanced topics such as: repository management, troubleshooting and application integrations.

T6500 - Subversion 1.4 for Developers - Remote ; 4 hr, Instructor-led training - Remote ; Max. 12 Students; All Class Materials Included

Our Standard Subversion for Developers course covers the complete spectrum of using Subversion for software development: from the typical development work cycle to mixed revisions to branching and merging operations.

T6700 - Subversion 1.4 for Administrators - Remote ; 4 hr, Instructor-led training; Max. 5 Students; All Class Materials Included

Subversion for Administrators - Standard covers server configuration, repository layout, strategies for backup and recovery, and migration from legacy systems.

T6800 - Subversion 1.5 for Developers: Standard - Remote; 4 hr, Instructor-led training; Max. 12 Students; All Class Materials Included

Our Standard Subversion for Developers course covers the complete spectrum of using Subversion for software development: from the typical development work cycle to mixed revisions to branching and merging operations.

T6810 - Subversion 1.5 for Developers: Enterprise - Remote ; 8 hr, Instructor-led training; Max. 12 Students; All Class Materials Included

Our Enterprise Subversion for Developers course covers the complete spectrum of using Subversion for software development as well as advanced enterprise-level features like merge tracking interactive conflict resolution and sparse checkouts. This course also includes developer labs with hands on exercises.

T6820 - Subversion 1.5 for the 1.x Developer - Remote ; 4 hr, Instructor-led training - Remote ; Max. 12 Students; All Class Materials Included

Subversion for the 1.x Developer is specifically designed for developers who are currently using pre-1.5 versions of Subversion and want to gain a complete understanding of the new functionality introduced in the most recent releases.

T6850 - Subversion 1.5 for Administrators - Remote ; 4 hr, Instructor-led training - Remote ; Max. 5 Students; All Class Materials Included

Subversion for Administrators - Standard covers server configuration, repository layout, strategies for backup and recovery, and migration from legacy systems

T8100 - Open Source Training: Intro to Open Source - Remote ; 4 hr, Instructor-led training - Remote ; Max. 12 Students; All Class Materials Included

This course is designed to introduce the concept of open source software and open source development to developers or managers who may have heard the term “open source” but do not fully understand the phenomenon. Those attending the course should leave with a solid grasp of what open source is, what software is available as open source, how open source projects work, and how open source techniques can be applied in your organization.

T8200 - Open Source Training: Open Source Licensing and Beyond - Remote ; 4 hr, Instructor-led training - Remote; Max. 12 Students; All Class Materials Included;

This course is designed for people who will be widely reusing existing open source packages or will be releasing software as open source. It covers some of the major open source and free software licenses and demonstrates how they differ. Those attending the course should leave with an understanding of how these licenses impact the use or release of open source software.

T8300 - Open Source Training: Working with Open Source; 7 hr, Instructor-led training - Remote ; Max. 12 Students; All Class Materials Included

Working with Open Source covers the mechanics of working with, or starting, open source software development projects. After analyzing what makes a robust open source community, using examples of significant projects, the module describes how corporations and their employees can successfully work within open source projects and then outlines a step-by-step approach for corporations wishing to initiate and sponsor their own open source projects in support of their business goals.

T8400 - Open Source Training: Culture of Open Source - Remote; 4 hr, Instructor-led training - Remote; Max. 12 Students; All Class Materials Included

Open source is more than a licensing model or making source code available – it is a social environment as well, one facet of the “geek culture”. There is a code of conduct that managers and developers need to be aware of when

participating in open source projects. This module will address the “rules of the game” for operating in an open source environment.

GT2015 - CollabNet TeamForge End User Fundamentals - 4 hr, Instructor-led training - Remote ; Max. 12 Students; All Class Materials Included

CollabNet TeamForge Project Member Fundamentals provides a guided tour of the CollabNet TeamForge application, introducing key concepts and explaining each component of the product and how they work seamlessly together to support end to end software development processes. At the end of this course, end users and developers will have the knowledge required to effectively work and collaborate within a CollabNet TeamForge project.

GT2025 - CollabNet TeamForge Project Administrator Fundamentals - 4 hr, Instructor-led training - Remote ; Max. 12 Students

CollabNet TeamForge Project Administration Fundamentals prepares project administrators with the information required to configure CollabNet TeamForge projects to meet each project team's specific requirements. At the end of this course, project administrators will have the knowledge required to set up their project workspace, configure each of the project tools, add project members and report on project activity

GT2035 - CollabNet TeamForge Site Administrator Fundamentals - 4 hr, Instructor-led training - Remote ; Max. 12 Students; All Class Materials Included

CollabNet TeamForge Site Administration Fundamentals provides site administrators with the information required to configure and manage the CollabNet TeamForge application to meet the development and collaboration requirements of their user base. At the end of this course, site administrators will have the knowledge required to perform user and project administration, create basic integrations and monitor system tools.

GT2040 - CollabNet TeamForge Site Branding - 1 hr, Instructor-led training - Remote ; Max. 12 Students; All Class Materials Included

CollabNet TeamForge Site Branding provides site administrators with the information required to customize the look and feel of a CollabNet TeamForge site. At the end of this course, site administrators will have the knowledge required to update their site's overall look and feel through the use of CSS, Velocity template, resource bundle and JavaScript overrides.

GT5010 - Subversion 1.6 for Developers: Standard - Remote ; Max 12 Students; All Class Materials Included

Our Standard Subversion for Developers course covers the complete spectrum of using Subversion for software development: from the typical development work cycle to mixed revisions to branching and merging operations.

GT5030 - Subversion 1.6 for Administrators - Remote ; Per Student; All Class Materials Included

Subversion for Administrators - Standard covers server configuration, repository layout, strategies for backup and recovery, and migration from legacy systems

GT5040 - Subversion 1.6 for the 1.x Developer - Remote ; Max 12 Students; All Class Materials Included

Subversion for the 1.x Developer is specifically designed for developers who are currently using pre-1.5 versions of Subversion and want to gain a complete understanding of the new functionality introduced in the most recent releases.

GS9000 - CollabNet TeamForge Consulting Subscription Service; 2 hr. Per Month, Minimum 6 Month Subscription - Remote; All Class Materials Included

Subscription consulting services – 2 hrs a month with a 6 MONTH MINIMUM SUBSCRIPTION. Includes access to Service-ware – NO DISCOUNTS ALLOWED.

DISA-15201 - Forge.mil CollabNet TeamForge End User Open Enrollment Training (1 day, per user) - Onsite; Minimum 10 Students; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

This course is an extended version of the CollabNet TeamForge - Project Member Fundamentals class and includes a series of hands-on lab sessions to provide students with an opportunity to practice what they have learned. Special focus on Forge.mil

DISA-15301 - Forge.mil CollabNet TeamForge Project Administrator Open Enrollment Training (1 day, per user) - Onsite; Minimum 10 Students; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

This course is an extended version of the CollabNet TeamForge - Project Administration Fundamentals class and includes a series of hands-on lab sessions to provide students with an opportunity to practice what they have learned. Special focus on Forge.mil

GT15101 - Subversion 1.6 for Developers open Enrollment Training; 1 Day; Per Student - Onsite; Minimum 10 Students; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

Our Enterprise Subversion for Developers course covers the complete spectrum of using Subversion for software development as well as advanced enterprise-level features like merge tracking interactive conflict resolution and sparse checkouts. This course also includes developer labs with hands on exercises.

GT15201 - CollabNet TeamForge End User Open Enrollment Training; 1 Day; Per Student - Onsite; Minimum 10 Students; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

This course is an extended version of the CollabNet TeamForge - Project Member Fundamentals class and includes a series of hands-on lab sessions to provide students with an opportunity to practice what they have learned.

GT15301 - CollabNet TeamForge Project Administrator Open Enrollment Training; 1 Day; Per Student - Onsite; Minimum 10 Students; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

This course is an extended version of the CollabNet TeamForge - Project Administration Fundamentals class and includes a series of hands-on lab sessions to provide students with an opportunity to practice what they have learned.

GT5036 - Subversion 1.6 for Administrators (Full Day) - Onsite; Max 5 Students; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

Subversion for Administration - Advanced covers server configuration, repository layout, strategies for backup and recovery, and migration from legacy systems. This course also includes advanced topics such as: repository management, troubleshooting and application integrations.

T5810 - Subversion 1.6 for Developers-Train the Trainer: Standard - Onsite; 16 hr, Instructor-led training; Max. 5 Students; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

Subversion for Developers Train the Trainer – Standard prepares your training staff to effectively roll out Subversion to your development teams.

T5820 - Subversion 1.6 for Developers-Train the Trainer: Enterprise - Onsite; 24 hr, Instructor-led training - Onsite; Max. 5 Students; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

Subversion for Developers Train the Trainer – Enterprise prepares your training staff to effectively roll out Subversion, including advanced enterprise features, to your development teams.

T6501 - CollabNet Additional seats instructor-led classes

Additional seats can be purchased for any one of the remote or on-site training courses.

T6550 - Subversion 1.4 for Developers - Onsite; 4 hr, Instructor-led training; Max. 12 Students; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

Our Standard Subversion for Developers course covers the complete spectrum of using Subversion for software development: from the typical development work cycle to mixed revisions to branching and merging operations.

T6750 - Subversion 1.4 for Administrators - Onsite; 4 hr, Instructor-led training; Max. 5 Students; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

Subversion for Administrators - Standard covers server configuration, repository layout, strategies for backup and recovery, and migration from legacy systems.

T6805 - Subversion 1.5 for Developers: Standard - Onsite; 4 hr, Instructor-led training; Max. 12 Students; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

Our Standard Subversion for Developers course covers the complete spectrum of using Subversion for software development: from the typical development work cycle to mixed revisions to branching and merging operations.

T6815 - Subversion 1.5 for Developers: Enterprise - Onsite; 8 hr, Instructor-led training; Max. 12 Students; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

Our Enterprise Subversion for Developers course covers the complete spectrum of using Subversion for software development as well as advanced enterprise-level features like merge tracking interactive conflict resolution and sparse checkouts. This course also includes developer labs with hands on exercises.

T6822 - Subversion 1.5 for the 1.x Developer - Onsite; 4 hr, Instructor-led training - Onsite; Max. 12 Students; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

Subversion for the 1.x Developer is specifically designed for developers who are currently using pre-1.5 versions of Subversion and want to gain a complete understanding of the new functionality introduced in the most recent releases.

T6855 - Subversion 1.5 for Administrators - Onsite; 4 hr, Instructor-led training - Onsite; Max. 5 Students; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

Subversion for Administrators - Standard covers server configuration, repository layout, strategies for backup and recovery, and migration from legacy systems.

T6900 - Subversion 1.5 for Developers-Train the Trainer: Standard - Onsite; 16 hr, Instructor-led training - Onsite; Max. 5 Students; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

Subversion for Developers Train the Trainer – Standard prepares your training staff to effectively roll out Subversion to your development teams.

T6950 - Subversion 1.5 for Developers-Train the Trainer: Enterprise - Onsite; 24 hr, Instructor-led training - Onsite; Max. 5 Students; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

Subversion for Developers Train the Trainer – Enterprise prepares your training staff to effectively roll out Subversion, including advanced enterprise features, to your development teams.

T6975 - Subversion Training Material Perpetual License (Instructor-Led Training and Web Based Training); All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

Perpetual license to use Subversion training materials (Instructor-Led Training and Web Based Training).

T6978 - Subversion Training Material Perpetual License (Instructor-Led Training and Web Based Training) - Maintenance; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

Yearly maintenance for the perpetual license to use Subversion training materials (Instructor-Led Training and Web Based Training) **For legacy perpetual license purchases.

T8150 - Open Source Training: Intro to Open Source; 4 hr, Instructor-led training - Onsite; Max. 12 Students; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

This course is designed to introduce the concept of open source software and open source development to developers or managers who may have heard the term “open source” but do not fully understand the phenomenon. Those attending the course should leave with a solid grasp of what open source is, what software is available as open source, how open source projects work, and how open source techniques can be applied in your organization.

T8250 - Open Source Training: Open Source Licensing and Beyond; 4 hr, Instructor-led training - Onsite; Max. 12 Students; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

This course is designed for people who will be widely reusing existing open source packages or will be releasing software as open source. It covers some of the major open source and free software licenses and demonstrates how they differ. Those attending the course should leave with an understanding of how these licenses impact the use or release of open source software.

T8350 - Open Source Training: Working with Open Source; 7 hr, Instructor-led training - Onsite; Max. 12 Students; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

This course is designed for people who will be widely reusing existing open source packages or will be releasing software as open source. It covers some of the major open source and free software licenses and demonstrates how they differ. Those attending the course should leave with an understanding of how these licenses impact the use or release of open source software.

T8450 - Open Source Training: Culture of Open Source -; 4 hr, Instructor-led training - Onsite; Max. 12 Students; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred – not to exceed GSA per diem rates

Open source is more than a licensing model or making source code available – it is a social environment as well, one facet of the “geek culture”. There is a code of conduct that managers and developers need to be aware of when participating in open source projects. This module will address the “rules of the game” for operating in an open source environment.

T9001 - Subversion 1.5 advanced workshop; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

Workshop focused on formulating an organization's needs for version control and configuration management and how to best utilize Subversion to meet those needs. Two days on-site.

S7126 - Application Lifecycle Management Process Codification Workshop; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

The Application Lifecycle Management Process Codification Workshop is designed to assist CollabNet customers to create a software development process for use on their application development project. One the process has been defined it is implemented in the CollabNet TeamForge tool using the standard capabilities of CollabNet TeamForge for defining artifacts (requirements, bugs, issues, tasks) and workflows. The workshop is delivered over a 3 day period in a workgroup format limited to 10 attendees.

GS1610 - Subversion Applied Workshop; 2 days Onsite; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

Workshop focused on formulating your organization's needs for version control and configuration management and how to best utilize Subversion to meet those needs. Covers the following topics: Repository Layout, Branching Patterns, Tagging, Access Control, Release Management, Workspace Management. Action taken:

- Examine your current software development and release management needs
- Establish best practices on the use of Subversion that meet your needs

GS1620 - Subversion Migration Planning; 2 days Onsite; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

Workshop focused on helping an organization:

- Assess the need to migrate legacy version control data and the value in doing so
- Define what data can and should be migrated
- Plan the migration process itself
- Evaluate what, how and when to migrate to Subversion

GT2010 - CollabNet TeamForge End User Fundamentals - 4 hr, Instructor led training - Onsite; Max. 12 Students; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

CollabNet TeamForge Project Member Fundamentals provides a guided tour of the CollabNet TeamForge application, introducing key concepts and explaining each component of the product and how they work seamlessly together to support end to end software development processes. At the end of this course, end users and developers will have the knowledge required to effectively work and collaborate within a CollabNet TeamForge project.

GT2020 - CollabNet TeamForge Project Administrator Fundamentals - 4 hr, Instructor-led training - Onsite; Max. 12 Students; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

CollabNet TeamForge Project Administration Fundamentals prepares project administrators with the information required to configure CollabNet TeamForge projects to meet each project team's specific requirements. At the end of this course, project administrators will have the knowledge required to set up their project workspace, configure each of the project tools, add project members and report on project activity.

GT2030 - CollabNet TeamForge Site Administrator Fundamentals - 4 hr, Instructor-led training - Onsite; Max. 12 Students; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

CollabNet TeamForge Site Administration Fundamentals provides site administrators with the information required to configure and manage the CollabNet TeamForge application to meet the development and collaboration requirements of their user base. At the end of this course, site administrators will have the knowledge required to perform user and project administration, create basic integrations and monitor system tools.

GT2800 - CollabNet TeamForge Train-the-Trainer - 3 Day, Instructor-led training - Onsite; Max. 5 Students; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

CollabNet TeamForge Train the Trainer is designed for large organizations with a dedicated training staff. The entire Project Member and Project Administrator Fundamentals curriculum is covered with a specific focus on how the material is delivered in a classroom environment.

GT2900 - CollabNet TeamForge Training Material Perpetual License to use CollabNet TeamForge training materials (Instructor-Led Training and Web Based Training); All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

Perpetual license to use CollabNet TeamForge training materials (Instructor-Led Training and Web Based Training).

GT2905 - CollabNet TeamForge Training Material Perpetual License - Maintenance (20% per year) All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

Yearly maintenance charge for the perpetual license to use CTF training materials (ILT and WBT) **For legacy perpetual license purchases.

GT5015 - Subversion 1.6 for Developers: Standard - Onsite; Max 12 Students; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

Our Standard Subversion for Developers course covers the complete spectrum of using Subversion for software development: from the typical development work cycle to mixed revisions to branching and merging operations.

GT5020 - Subversion 1.6 for Developers: Enterprise - Onsite; Per Student; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

Our Enterprise Subversion for Developers course covers the complete spectrum of using Subversion for software development as well as advanced enterprise-level features like merge tracking interactive conflict resolution and sparse checkouts. This course also includes developer labs with hands on exercises.

GT5035 - Subversion 1.6 for Administrators - Onsite; Max 5 Students; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

Subversion for Administrators - Standard covers server configuration, repository layout, strategies for backup and recovery, and migration from legacy systems.

GT5045 - Subversion 1.6 for the 1.x Developer - Onsite; Max 12 Students; All Class Materials Included; Travel and Expenses not included and to billed on actuals incurred - not to exceed GSA per diem rates

Subversion for the 1.x Developer is specifically designed for developers who are currently using pre-1.5 versions of Subversion and want to gain a complete understanding of the new functionality introduced in the most recent releases.
