if the subdivision did not participate in the acquisition of the software. Further, the software may be used on a sharing basis where multiple agencies have joint projects that can be satisfied by the use of the software placed at one ordering activity's site. This would allow other agencies access to one ordering activity's database. For ordering activity public domain databases, user agencies and third parties may use the computer program to enter, retrieve, analyze and present data. The user ordering activity will take appropriate action by instruction, agreement, or otherwise, to protect Telos' proprietary property with any third parties that are permitted access to the computer programs and documentation in connection with ordering activity's permitted use of the computer programs and documentation. For purposes of this section, all such permitted third parties shall be deemed agents of the ordering activity.

(3) Except as is provided in paragraph 9.b(2) above, the ordering activity shall not provide or otherwise make available the software or documentation, or any portion thereof, in any form, to any third party without the prior written approval of Telos. Third parties do not include prime Contractors, subcontractors and agents of the ordering activity who have the ordering activity's permission to use the licensed software and documentation at the facility, and who have agreed to use the licensed software and documentation only in accordance with these restrictions. This provision does not limit the right of the ordering activity to use software, documentation, or information therein, which the ordering activity may already have or obtains without restrictions.

(4) The ordering activity shall have the right to use the computer software and documentation with the computer for which it is acquired at any other facility to which that computer may be transferred, or in cases of Disaster Recovery, the ordering activity has the right to transfer the software to another site if the ordering activity site for which it is acquired is deemed to be unsafe for ordering activity personnel; to use the computer software and documentation with a backup computer when the primary computer is inoperative; to copy computer programs for safekeeping (archives) or backup purposes; to transfer a copy of the software to another site for purposes of benchmarking new hardware and/or software; and to combine it with other software, provided that the unmodified portions shall remain subject to these restrictions.

(5) "Commercial Computer Software" may be marked with the Contractor's standard commercial restricted rights legend, but the schedule contract and schedule pricelist, including this clause, "Utilization Limitations" are the governing terms and conditions, and shall take precedence and supersede any different or additional terms and conditions included in the standard commercial legend.

### 10. SOFTWARE CONVERSIONS - (132-32 AND 132-33)

There will be no additional charge to the ordering activity when conversion from one version of the software to another is made as the result of a change in operating system, or from one computer system to another, provided that the software is covered by maintenance at the time of conversion. Under a perpetual license (132-33), the purchase price of the new software shall be reduced by the amount that was paid to purchase the earlier version.

### 16. DESCRIPTION OF IT PROFESSIONAL SERVICES AND PRICING

- a. Representative education and experience qualifications of Telos' IT Services categories are provided at the end of this section. These labor categories allow for an equivalent combination of education, experience and/or training that provides the required knowledge, skills, and abilities. Telos labor categories are offered in the same manner as Telos sells to its commercial and other ordering activity customers.

Below are the equivalencies based on OPM's guidelines for qualifying education and result in a one for one equivalency (One year of education = One year experience):

Associate's Degree or 2 years education above high school = 2 years of experience

Bachelor's Degree or 4 years education above high school leading towards a bachelor's degree = 4 years experience

Master's Degree or 2 years of progressively higher level graduate education = 6 years experience

Ph.D. or equivalent Doctorate degree or 3 years of progressively higher level graduate education = 7 years experience

Example: A labor category requires a BS and 15 years experience...If a person had no degree at all, it would require that they have 19 years experience to satisfy the labor category description. If a person had an associate's degree, it would require that they have 17 years experience to satisfy the labor category description.

- b. Pricing for all IT Professional Services shall be in accordance with Telos' customary commercial practices as follows:
- (1) The minimum amount of services that may be ordered is one day, consisting of eight billable hours, for any single labor category. Services must be ordered in one day increments for services performed on-site in ordering activity facilities; however, if less than eight hours are worked in a day due to absence by Telos service personnel, the Government will pay only for the hours actually worked. Orders for less than full day increments, i.e., part-time assignments, will normally be accepted only when performance will be in Telos facilities.
  - (2) Hours: All services will be performed during the ordering activity's normal prime shift working hours, if services are performed at the ordering activity site. For services performed at a Telos facility, the normal working hours of the Telos facility will be observed. Labor rates are based on an eight-hour workday, Monday through Friday, excluding Government holidays, and a forty-hour workweek.
  - (3) Rates: All service rates are exclusive of overtime, shift differential, and travel charges.
  - (4) Overtime and shift differential may be available outside the scope of this contract.
  - (5) Travel Charges: For assignments of any duration within a 50-mile radius of the Washington, DC metropolitan area, local travel costs to and from the work site will not be charged to the Government. For assignments outside this radius, travel charges will be charged in accordance with the Federal Travel Regulations.

## Customer Information

- (6) **Travel Time:** Time spent by contractor personnel in transit to a work location beyond a 50 mile radius of the nearest listed Telos Service Office will be paid by the Government at the rate in the Schedule, not to exceed eight hours per trip to or from the work location. Telos agrees to use the most expeditious means of transportation in such cases.
- (7) **Relocation:** For sufficiently long term assignments, e.g., more than one year, Telos will undertake to relocate personnel to the work location to minimize travel cost. When relocation is offered by Telos and approved by the ordering activity, relocation costs will be paid at rates not to exceed those authorized by FTR.
